

# The West “Pulse”

West Metal Works, Inc.

Newsletter

Issue 1, July 2016

**Recent Project:** West Metal Works, Inc. was part of a team of specialists, responsible for the repair of a fatigued and failing rotor spider assembly at a New York Power Authority (NYPA) hydro-electric generating station. West Metal Works, Inc. was responsible for the removal of all eight (8) rotor spider assembly ledges, weld preparation, and welding of new ledges in their place, while maintaining strict adherence to uniquely engineered and project specific, welding procedures, qualifications, and specifications.

Be sure to check out the attached link for more details on the project:

<https://www.youtube.com/watch?v=ByfWDcjgR54>
